

GDPR (General Data Protection Regulation)

Send Email and Send Email to Submitter Action's have been updated for compliance with GDPR, which is now in effect.

Each action allows the Form Editor to specify which fields should NOT be sent when the email is generated.

1.A

Edit action

Select input used for submitter's email address

Select inputs using the dropdown. Click (x) to remove options

Select an input

Email (Step 1) x

Omitted Fields

Select inputs using the dropdown. Click (x) to remove options

Select input(s)

1.B

Omitted Fields

Select inputs using the dropdown. Click (x) to remove options

✓ Step 1

- Email
- Feedback
- First name
- Last name

Use the dropdown (pictured above) to select fields that should be excluded from the email in order to comply with the new regulations.

After making a selection, the field will be shown underneath the dropdown, with an option to remove it from the list in case of accidental selection.

2.

Omitted Fields

Select inputs using the dropdown. Click (x) to remove options

Select input(s) ↓

Email (Step 1) × First name (Step 1) × Last name (Step 1) ×

The image shows a user interface for managing form fields. At the top, there is a light blue header bar with the text "Omitted Fields" and a sub-header "Select inputs using the dropdown. Click (x) to remove options". Below this is a dropdown menu with the placeholder text "Select input(s)" and a double-headed arrow icon on the right. Underneath the dropdown, three input fields are displayed horizontally. Each field contains text indicating it is a required field from a previous step: "Email (Step 1)", "First name (Step 1)", and "Last name (Step 1)". To the right of each field is a small black "x" icon, which serves as a button to remove that field from the list.

We hope you'll enjoy this easy and effective way to make your forms compliant with GDPR!
